Forecast for Friday 23 Jul 2021

Weather: Dry overnight, perhaps some mist forming in valleys and low cloud will creep west from the east coasts over some of the eastern ranges. Any low cloud tending to burn away quite quickly in the morning leaving another sunny and warm day. There is the chance of an isolated heavy shower in the afternoon. Possibly some low cloud spreading west from the coasts once again in the evening.

Chance of cloud free mountain/hill tops above 800m: 90%, perhaps some patchy low cloud in the morning and evening especially for eastern ranges.

Visibility: Generally good or very good but around dawn there may be patchy or scattered low cloud from 600ft for more eastern ranges like the Trossachs and around Loch Lomond. This will clear readily during the morning but may reform during the evening. Otherwise it may be hazy at times.
